## Management Report of Fund Performance (June 30, 2011)

### Series A and Series I

#### Results of Operations

For the period ending June 30, 2011, the MD Growth Investment Limited ("the Fund") generated a total return of 1.2%.

Global equities carried forward positive momentum from 2010 to start the year off strong, however rising energy prices amid geopolitical unrest in oil producing regions, and the devastating earthquake and tsunami in Japan in March erased these early gains. April saw equities return to positive territory for the period, but uncertainty over the strength of the global economy and the return of sovereign debt concerns in Europe weighed on returns during May and June. For the six-month period ended June 30, 2011 the MSCI World Index, which represents the aggregate common share returns of the largest developed world companies, gained 3.3% in local currencies, or 2.6% in Canadian dollar terms. Other factors that affected the Fund's performance are summarized below.

Being a globally diversified investment product, the Fund held a position in most developed nations that are listed in the MSCI World Index mentioned above. The United States on average received the largest allocation by a substantial margin, followed by Europe, the developed Pacific Rim Region and a modest allocation to emerging markets. Within Europe, the largest country exposure on average was to the United Kingdom, while within the Pacific region, the largest country exposure was to Japan. The positions in the United States had the largest positive contribution to return. Japanese equity positions detracted the most from return.

Foreign currency exposure had a significant and negative impact on the Fund's performance over the first half of the year. The negative impact of currency was primarily attributable to exposure to the U.S. dollar, although Japanese Yen and emerging market currency exposures in aggregate also detracted from return. The strength of the Euro helped to offset some of the negative currency impact. The dynamic currency management program, introduced at the beginning of the year, added to performance over the period primarily by reducing exposure to the U.S. dollar and Japanese Yen which were both lower.

Out of the ten industrial sectors represented in the portfolio, the Financials and Energy sectors received on average the highest portfolio weightings, while Telecommunication Services and Utilities received on average the lowest allocations. The Energy and Consumer Discretionary sectors had the most significant positive contribution to return while the Financials and Information Technology sectors detracted the most.

Throughout the period, the Fund's Investment Advisors maintained focus on their respective investment styles. The regional and sector weights in the Fund remained relatively consistent throughout the year.

As at June 30, 2011, the total net asset value of the Fund was \$1.7 billion, a decrease of 9% from the beginning of the year. Although the results from operations contributed positively to the net asset value of the Fund, unitholder redemptions decreased the net asset value of the Fund. Revenues and expenses were similar to the same period last year while net gains from investments were higher than the previous year.

#### Recent Developments

##### Strategic Changes

As at June 30, 2011 the assets in the Fund were allocated among six Investment Advisors as follows:

## Management Report of Fund Performance (June 30, 2011)

### Past Performance

The following bar chart shows the Fund's annual performance for each of the years shown, and illustrates how the Fund's performance changed from year to year. The chart shows, in percentage terms, how much an investment made on the first day of each calendar year would have grown or decreased by the last day of each calendar year. Although the Fund's Series I shares were created in 2009, they were not sold until 2010 and consequently for 2010 did not report a full financial year. As such the 2010 performance data is not available for the chart.

The performance information assumes that all distributions made by the Fund were reinvested in additional shares of the Fund and does not take into account sales, redemptions, distributions or other optional charges that would reduce returns. How the Fund has performed in the past does not necessarily indicate how the Fund will perform in the future.

### Year-By-Year Returns

\*For the six-month period ended June 30, 2011.

\*\*Returns are for the 6 month period to June 30, 2011. Series I shares do not charge a management fee at the fund level, and therefore may report higher returns. Series I shares are available to qualified Institutional Investors who pay a separate negotiated management fee directly to MD Physician Services Inc.

### Regarding Forward-Looking Statements

This document contains forward-looking statements. Such statements are generally identifiable by the terminology used, such as "plan", "anticipate", "intend", "expect", "estimate", or other similar wording.

These forward-looking statements are subject to known and unknown risks and uncertainties and other factors which may cause actual results, levels of activity and achievements to differ materially from those expressed or implied by such statements. Such factors include, but are not limited to: general economic, market and business conditions; fluctuations in securities prices; fluctuation in interest rates and foreign currency exchange rates; and actions by governmental authorities. Future events and their effects on the Fund may not be those anticipated. Actual results may differ materially from the results anticipated in these forward-looking statements.

<sup>1</sup> This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. The net assets per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in Note 2 of the Notes to Financial Statements. Net assets per unit are presented for 2007 through 2011, net asset values per unit are presented for 2006.

<sup>2</sup> Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial year.

<sup>3</sup> Distributions were paid in cash or reinvested in additional units of the Fund, or both.

<sup>4</sup> The results shown are for the period January 15 - December 31, 2010.

Portfolio turnover rate <sup>4</sup>	21.81%	208.86%
Net asset value per unit	\$8.98	\$8.81

<sup>1</sup> This information is provided as at June 30 or December 31 of the period shown.

<sup>2</sup> Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. Effective July 1, 2010, goods and services tax ("GST") was replaced by the harmonized sales tax ("HST") in certain provinces and is applicable at higher rates than the GST. HST is being paid by the Fund and results in a higher MER than in previous years.

<sup>3</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

<sup>4</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

<sup>5</sup> The results shown are for the period January 15 - December 31, 2010.
